

Make charging your smart devices more convenient

During fabrication, Lakeside Surface's skilled team of professionals will integrate a wireless charging system right into your countertop, allowing you to charge your device simply by placing it on the designated area.

- Many new smartphones and devices have built in charging capability, including Samsung's Galaxy S6 and S7.
- Adapters are available for iPhone and other non-QI enabled devices.

Inductive charging allows the consumption of electricity to be minimal, providing a low cost, low maintenance surface solution for safe power transfer compared with the traditional cable-based contact method.

Ask your gallery consultant or contact Lakeside Surfaces to learn more about adding the convenience of a charging station to your countertop.
