The LAKESIDE EXPERIENCE

There is a difference between countertop companies. Installing countertops doesn't have to be painful, so make sure you choose a company that makes finishing your dream kitchen a breeze.

PEEK BEHIND THE

SCENES AT LAKESIDES

THERE IS A DIFFERENCE

The advantages discussed here may seem simple and most are assumed to be basic components of a successful installation. We can assure you, they are not.

TRAINING AND PROCESSES MAKE A DIFFERENCE

Many fabricators don't have written quality or training processes. Lakeside does. Our processes are reviewed constantly by a full time quality control department and a series of regional and corporate service managers.

"ON-STAFF" MEANS RESPONSIBLE

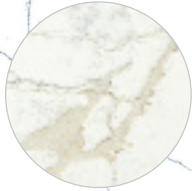

Many fabricators don't have on-staff installers; this means your project is going to be sub-contracted out to another company that may have an entirely different standard of quality than you are expecting. Lakeside's service teams are 100% on-staff and respect your home as if it were their own.

WARRANTY AND QUALITY CHISELED BY OVER 30 YEARS OF EXPERIENCE

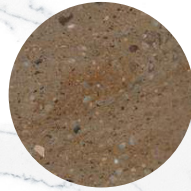

Many fabricators can't, or won't, stand by their own quality standards. Lakeside offers a dual warranty that covers material defects from the manufacturer as well as production or install issues.

SURFACES AT A GLANCE

Match the product to your needs. Invariably, we install organic materials like marble and granite, and customers were never informed about the characteristics of natural stone. They have imperfections. They have fissures. They do stain. If you look at these as “character” in the surface, then you have a match. If you are looking for a more uniform and durable surface, you might consider quartz. Regardless, never make a selection from a small sample! Whenever possible, you should view a larger piece or slab of your selection.

- QUARTZ** The most popular choice is quartz for its durability and stain resistance.
- Harder than granite
 - Non-porous
 - Color and pattern has less variance than natural stone
 - Virtually stain proof
 - No sealing
 - As heat resistant as granite

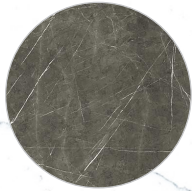

- SOLID SURFACE** Corian is the best known name in this category of acrylic polymer surfaces.
- Color and consistency throughout the surface
 - Durable to a degree, although heat sensitive
 - Can be cut / chipped, but can also be sanded out and repaired

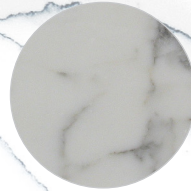

- QUARTZITE** A luxurious and unique natural material.
- Natural product, so color and consistency can vary widely; including color, fissures and imperfections
 - Has to be maintained and sealed
 - Susceptible to staining

- WOOD TOPS** Nothing adds warmth and natural beauty to a kitchen quite like wood countertops.
- Natural product, so color consistency can vary widely
 - Has to be maintained
 - Can weather
 - Caribou technology prevents staining, warping and intensive maintenance

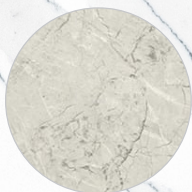

- PORCELAIN** These ultra-compact materials are at the leading edge of technology.
- Waterproof
 - Larger slab sizes
 - Exterior & flooring applications
 - Harder than granite & non-porous
 - Color and pattern has less variance than natural stone
 - Virtually stain proof
 - No sealing
 - As heat resistant as granite

- MARBLE** While a natural stone, marble is a softer material and may not be suitable for all applications.
- Extremely soft surfaces and will scratch and stain
 - Natural product, so color and consistency can vary widely; including color, fissures and imperfections
 - Has to be maintained and sealed
 - Susceptible to staining
 - Best suited for low traffic areas or non-countertop applications

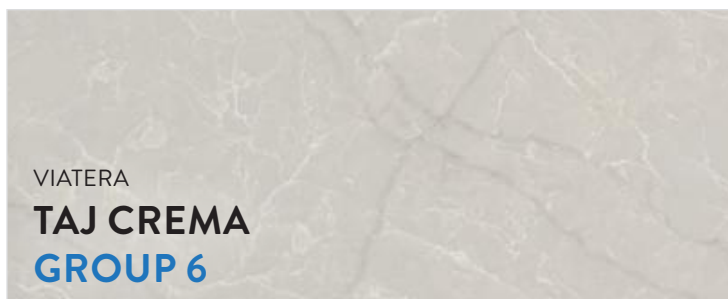

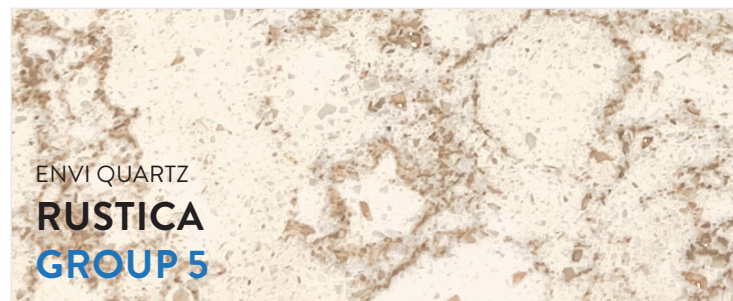

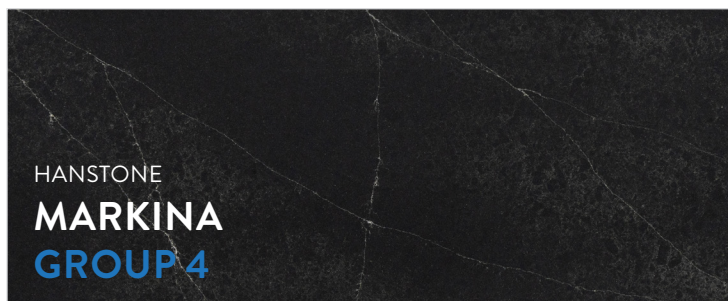

- GRANITE** The look of luxury for decades.
- Natural product, so color and consistency can vary widely; including color, fissures, and imperfections
 - Has to be maintained and sealed
 - Susceptible to wine and oil staining

- LAMINATE** Developed in 1912, laminate quickly became known for its durability and economical price point for home usage in the 60's housing boom.
- Plastic impregnated paper in nature
 - Durable to a degree
 - Can be cut / chipped
 - Susceptible to hot surfaces - can melt
 - Can be perceived as old fashioned

COMPOSITE SINKS

Granite composite sinks are made with approximately 85% specially processed quartz particles, the hardest constituent of granite, and coupled with a high grade acrylic binder.

Easy to clean, each sink features a natural anti-bacterial hygiene protection system and conforms to stringent environmental standards.

WE VALUE OUR CUSTOMERS OPINIONS, SEE WHAT THEY ARE SAYING ABOUT THEIR EXPERIENCES WITH LAKESIDE!

★★★★★ ERIC RICHARDS

Lakeside did a great job! From initial measurements to install. Crew was professional, courteous, and cleaned up after themselves.

★★★★★ MATT SCHWAB

Rodney & Cody arrived when they said. They were both very professional and have an upbeat attitude. They worked quickly, and we are very happy with the results.

★★★★★ ANDY ANDERSON

Extremely personable, knowledgeable, and professional. Answered all of our questions. 5 star.

★★★★★ JULIE EHlich

Great company to work with from order to install. Great job. Looks beautiful.

★★★★★ BARBARA JOHNSON

The two men were here promptly at 8:00am and were cleaning up 3 hrs. Later they had plenty of smiles and explanations. Evan and Seth worked well together in a small space. Thank-You for your quality workmanship.

★★★★★ LESLEE WAGNER

Nate and Matt installed my new countertops in my bathroom. They did a fantastic job. The countertops look beautiful. Couldn't have asked for nicer or more professional guys!

★★★★★ THOMAS KOHL

Purchase quartz countertops from Lakeside and could not be more pleased! Great showroom with many choices, reasonable prices and outstanding installation. Our installers, Mike and Evan, did a great job! Highly recommend you use Lakeside Surfaces!

★★★★★ NANCY K

Arrived on time and very friendly, knowledgeable installers. Explained how to care for countertops and answered all questions. Love the quality of the product and service of the installers.
